

Safety with Horses - A blended approach for the delivery of health and safety training: Warwickshire College

Safety with Horses - A blended approach for the delivery of health and safety training which incorporates both e-Learning and e-Assessment

The programme offers a combination of learning strategies and resources to cater for a wide variety of learning styles

The project has provided the appropriate systems to enable access for learners from non-traditional groups and also FE and WBL (Work Based Learners)

The distance learning safety programme developed attracts and supports a wide range of learners from Level 1 to degree students, through important safety information prior to study, or for employment.

The project has benefited via collaborations and membership to associated project work including:

- TRIADS (Tripartite Interactive Assessment Delivery System)
- OLAAF (On-line Assessment and Feedback) Project
- CLIVE (Computer Learning in Veterinary Education).
- JISC Project based at University of Derby.

The project has achieved Exceptionally high levels of retention, achievement and student feedback. And endorsement of learning materials and programme delivery by the awarding body and lead body, The British Horse Society in respect of 'Health and Safety with Horses'
